## MONTH IN PICTURES JANUARY 2022

Robson•Savage

# MONTHLY SNAPSHOT NOTABLE EVENTS 

- Global markets experienced a tough start to the year as surging inflation and a faster expected pace of US monetary policy normalisation sparked a widespread sell-off in risk assets. In this regard US inflation hit a 40 -year high of $7.5 \%$ in January, while the latest signals from the US Fed indicate a faster and earlier start to interest rate hikes, and a possible shrinking of their bloated balance sheet.
- In US dollar terms this resulted in a 4.9\% loss from the global equity market in January, while losses on some of the tech-heavy indices were even steeper (Nasdaq $100=-8.5 \%$, MSCI ACWI Growth $=-8.6 \%$ and MSCI ACWIIT $=-8.2 \%$ ).
- The sell-off was by no means universal though, with certain previously neglected sectors (Energy $=+13 \%$ \& Financials $=+1.3 \%$ ) and regions (Brazil $=+13 \%$ \& South Africa $=+6.8 \%$ ) making good dollar gains.
- The local market therefore held up surprisingly well during this turmoil, with local currency returns of $+0.9 \%$ from the ALSI and a solid $+2.4 \%$ from the Capped SWIX for the month, while the Rand strengthened by $3.5 \%$ against the US Dollar. Local equity market gains were however confined to Resources (+3.6\%) and Financials (+3.5\%), as Industrials ( $-1.9 \%$ ) and Listed Property $(-2.9 \%)$ ended the month lower.
- As things stand, the local equity market has now comfortably beaten global equities (+15\%) over the last 12 months (+24\% vs $+15 \%$ ), and is even more of an outperformer when compared to our emerging market peers (which lost $6 \%$ during this period)
- The SARB hiked interest rates by another 25 basis points, bringing the repo rate to $4 \%$ and the prime lending rate to $7.5 \%$. This was mainly done in anticipation of rising US interest rates and upside risks to the local inflation outlook. Rising interest/inflation rates weren't enough to derail the local bond market though, which returned $+0.8 \%$ in January compared to a rand loss of $5.5 \%$ from global bonds.
- Finance Minister Enoch Godongwana delivered a credible budget in February, with booming commodity prices gifting the fiscus with an extra R182 billion in taxes this year, compared to a tax revenue shortfall of almost the same amount the previous year. With a substantial portion of this windfall being used to reduce borrowing, government debt is now expected to stabilise at $75 \%$ of GDP (down from 95\% at its worst point), while no major tax increases were announced.
- Markets didn't move much in response to the budget, with Russia's invasion of Ukraine taking center stage the following morning. Although local markets came under a bit of pressure when the news broke, they have generally held up very well this year, delivering positive returns in 2022 compared to steep losses from many global asset classes (see slide 13).

## MONTHLY TIMELINE

## ASSET CLASS PERFORMANCE

 MEDIUM TERM

## ASSET CLASS PERFORMANCE LONG TERM

## MARKET PERFORMANCE WHAT PAST RETURNS GAN INVESTORS REASONABLY EXPECT?

## Given the performances of the various asset classes (see earlier slides), what level of historical returns (in both nominal and real terms) can

 investors reasonably have expected from the markets?To illustrate this, we calculated the hypothetical returns of various risk profiled 'portfolios' (Aggressive, Moderate and Conservative) using a rules-based asset allocation approach to cater for the change in the regulatory offshore allowance over time:

- The offshore allocation is kept at $5 \%$ below the prevailing regulatory maximum ( $15 \%$ to $2000,20 \%$ to $2006,25 \%$ to 2018 \& currently at $30 \%$ ).
- The equity allocation varies according to the risk profile, and is set at $75 \%$ for Aggressive, $55 \%$ for Moderate and $35 \%$ for Conservative, which applies to both the local (ALSI up to December 2001, SWIX up to June 2011, Capped SWIX thereafter) and offshore (MSCI All Country) portions.
- The remainder of the local assets is split between local bonds (ALBI) and cash (STeFI composite), with the local bond allocation being the same as the equity allocation in this sub-portion, i.e. $75 \%$ for Aggressive, $55 \%$ for Moderate and $35 \%$ for Conservative. The balance is kept in local cash.
- The remainder of the offshore assets is allocated to global bonds (FTSE WGBI).
- Fees are assumed at $0.4 \%$ p.a.

A graphical representation of the strategic and current asset allocations of the various risk-profiled 'portfolios' are provided below:

|  |  | LOCAL VS OFFSHORE | 75\% |  |  | 25\% (5\% below regulatory maximum) |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | GROWTH VS INCOME ASSETS | 75\% | $\longrightarrow 25 \%$ |  | 75\% | 25\% |
|  |  | EqUITIES VS BONDS Vs CASH | 100\% | 75\% | 25\% | 100\% | 100\% |
|  | Current allocation |  | ~56\% | ~14\% | $\sim 5 \%$ | $\sim 19 \%$ | $\sim 6 \%$ |

| 른ㄹ플을 |  | LOCAL VS OFFSHORE | 75\% |  |  | 25\% (5\% below regulatory maximum) |  |
