ANDANTE FUND

QUARTERLY FACT SHEET AS AT 31 MARCH 2020

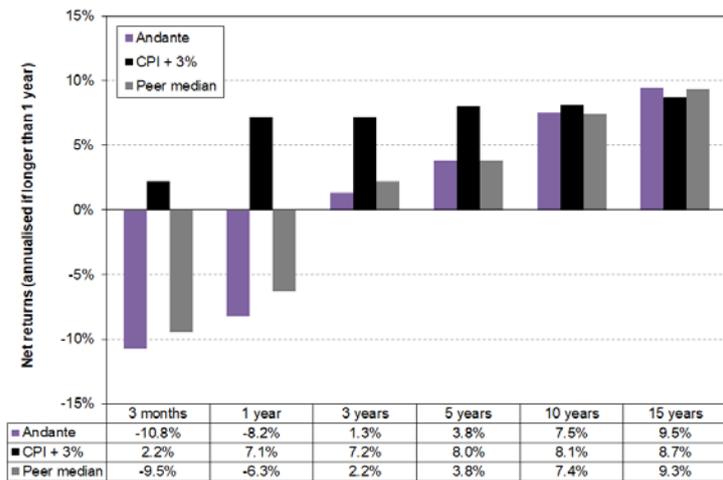

The Andante Fund invests in a range of local and foreign asset classes, including equities, listed property, bonds and cash. The management of the assets are outsourced to professional investment managers that have been given full discretion to allocate capital between (and within) these asset classes in line with their views of current and expected market and economic conditions, in proportions appropriate to the portfolio's objective, and subject to the regulatory limits applicable to retirement funds. Passive strategies may be included where deemed appropriate, either by the underlying managers themselves, or as separate building blocks. The underlying managers bring a diverse range of capabilities, investment styles and philosophies to the table, with the aim of achieving competitive relative performance throughout the market cycle.

GENERAL FUND INFORMATION

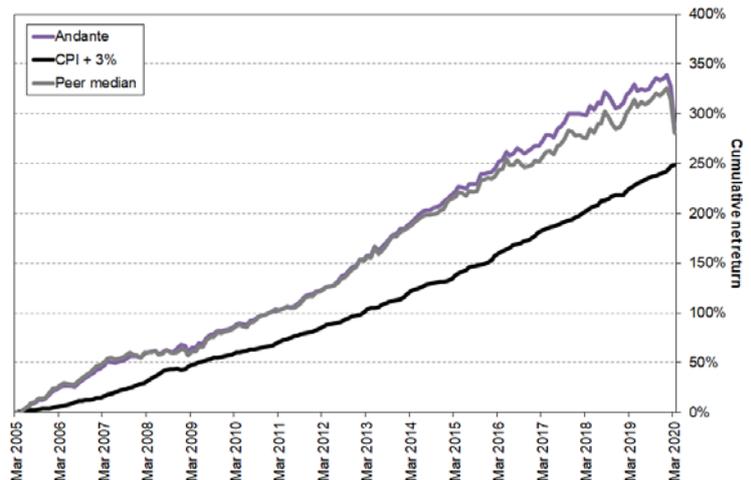

FUND:	Andante (/an' danteɪ/, meaning moderately slow)	HIGH	MED	LOW
Objective:	To provide moderate levels of investment growth over the medium term, while limiting losses over the short term. Given the fund's dual objectives, the portfolio is expected to have some exposure to equities and listed property (typically not more than 50%) in order to meet its growth objective. To meet its secondary objective the remainder of the portfolio's assets will typically be allocated to more stable asset classes such as bonds and cash.	Risk profile & suitability: Has a low to moderate risk profile, and is typically suitable for members who: <ul style="list-style-type: none"> • Are seeking reasonable levels of investment growth; • Have a reduced appetite for volatility; • Are unwilling to pay higher fees to guarantee against capital losses; • Want to house medium term capital in a bucket strategy. 		
Fund characteristics:	While the Andante Fund is expected to provide inflation-beating returns over the medium term, returns can be somewhat volatile over the short term, with the possibility of occasional, but relatively small, temporary losses.			
Return target:	Aims to achieve a net return of 3-4% a year above inflation over the medium term (i.e. three to five years).	Peer benchmark: Median of the Alexander Forbes Global Conservative survey		
Investment charges¹	0.78%

IMPORTANT NOTES

1. Reflects the estimated combined basic investment fees of the underlying managers. Some of the underlying portfolios include performance fee structures. The actual costs incurred in respect of these fees will be included if/when such charges have been incurred.
2. The Acumen Retirement Annuity Fund annuity strategy portfolios were officially opened in 2019. The performance and risk statistics on this fact sheet therefore reflect the historic performance of the underlying managers (using the average of those underlying portfolios that were operational at the time). Where applicable, performance is measured to the effective fact sheet date. The risk statistics are measured over a 15-year period.
